Brest ACC shall inform Madrid ACC of the activity of these areas and the availability of BELEN and POPUL flows.

When D32 is active, flow via BELEN is no longer available, Madrid ACC shall reroute traffics via POPUL.

When D33 is active, BELEN and POPUL are no longer available, Madrid ACC shall reroute traffics via NENEM.

FOR SIMULATION USE ONLY - NOT VALID FOR REAL OPERATIONS

### 3. Procedures for Coordination

#### 3.1. General Conditions for Acceptance of Flights

Due to the lack of agreement between French and Swiss ATC operations, the LOA between Madrid and Brest is **suspended**.

Thus, all flights shall be systematically coordinated between Swiss and French ATS units to define transfer conditions.

This coordination shall contain a Transfer waypoint, a Transfer Flight Level and a frequency.

For example, this coordination could be:

LFRR: "Hello Madrid, I have TAYIBC for you, destination LEBB at FL390"

LECM: "Hello, you can transfer him on route to NENEM at FL230, frequency 135.700"

## 4. Contributions

This document has been drafted in coordination between the ATC Operations Department France and Brest FIR staff.
