

# NOTAM

IVAO – French Division

Number : **N-FR-1117-3\_EN**

Date: **November 15, 2017**

Validity: **permanent**

Issued by the **ATC Operations** Department

Contact : [fr-atcops@ivao.aero](mailto:fr-atcops@ivao.aero)

Object: Information regarding the use of AFIS position

It is possible that a position called "AFIS" is opened on the network.

This type of position is controlled in a slightly different way than a conventional "tower".

This is why, in order to announce to the pilots that there will be no control service but only an information and alerting service, we recommend the controller two things:

1. Write in his ATIS the name of the position: "Pétaouchnok Information" instead of "Pétaouchnok Tower"
2. Connect to the network with the following callsign: "LFXX\_FIS\_TWR"

We insist on the fact that these two "rules" are recommendations only. Indeed, nothing would prevent you to open an AFIS position with the callsign: "LFXX\_TWR" on the network.

*This NOTAM applies to all members of the French Division and to any member of a foreign division owing a GCA in the French Division.*
